Disc & Joint Pain Relief Complex *Enhanced*

a natural pain reliever

In response to a patient need for natural pain reliever, Dr. Cox collaborated with a laboratory to review natural pain killers that could be combined for relieving joint pain. This pain includes spinal, extremity, and radicular pain. In response, this formula evolved. Patients find relief for peripheral and spinal degenerative disease.

It consists of the following natural pain relieving agents:

- curcumin 800 mg
- ginger root 5% extract 200 mg
- white willow bark 100 mg
- boswellia serrata extract 100 mg
- quercetin 100 mg
- devil's claw powder 50 mg
- valarian root 0.8% extract 50 mg
- passion flower 4:1 extract 50 mg
- turmeric 12:1 extract 50 mg
- Black Pepper (piperine from piper nigrum L.) 20 mg

from Dr. Cox ... My experience is that patients find relief for peripheral and spinal degenerative disease. Radiculopathy patients are typically on NSAIDs, COX inhibitors, and even mild narcotic drugs. However, the use of this natural pain relieving formula can assist and reduce the need for more powerful drugs and, eventually, oftentimes replace them. At this stage, it is a clinical decision in the use of natural pain relievers with the awareness of the less toxic effects of the natural pain relievers over customary drug use.
